

## The Seamstress

When a couple moves to the epic Western town of Tombstone they don't foresee that their marriage would change drastically and their lives would be in grave danger in no time at all. While the wife is bothered by severe nightmares and the eerie story told by a priest the husband turns into an unpredictable drunk. Both have no clue what's wrong with the Victorian home they bought and what the destiny of a young seamstress murdered in 1882 and a mysterious wedding dress have to do with the couple's momentary trouble. As things get worse Michelle Jenkins has to battle a race against time and life-threatening events. To be able to avoid a cruel crime repeating itself she has to know her enemies and one of them might be her beloved husband. To survive a ghostly nightmare, she needs to know who is real or who might be a demon of yesterday's notorious past of the town where killings occurred daily during the biggest silver rush in US history.
